Extracting with ExtractCraft is as easy as:

1 SOAK

Start the initial extraction by soaking your chosen botanical in 190 proof or higher, non-denatured ethanol. The length of the soak time will vary based on desired outcome. Avoid picking up chlorophyll by freezing the herb and ethanol prior to soaking.

2 FILTER

Filter the solution to remove undesirables. This filtered solution goes into the ExtractCraft machine for processing. The degree of filtration needed depends on the desired outcome.

3 CRAFT

With the solution in the machine, press the start button to begin processing. In 2 to 3 hours, you will have your oil, and reclaimed ethanol for reuse. You're now ready to use your oil as is, or craft it into any form or product you desire.
